Mega Twister

Cost-effective, Pull-Tight Twist Seals

The Mega Twister is a high-quality and cost-efficient sealing solution for all kinds of meters.

With a polycarbonate body and an acetal tab that is available in a variety of colours, the Mega Twister can be applied with coated or non-coated stainless steel wire with attention to different requirements.

The non-flammable high impact ABS plastic provides excellent barcoding contrast that adds to operation efficiency and easy identification.

Typical applications for the Mega Twister seal include the securing of utility meters, scales, gasoline pumps, drums and totes.

Features

- 1 Mega Twister seals are etched with permanent laser marking. Laser marking offers the highest level of security as it cannot be removed and replaced.
- 2 The side flap area is etched with sequential numbering, logo or other customised marking for high security and easy identification.
- 3 Colour coding is possible with different combinations of the Mega Twister's clear transparent body and its twister caps, which come in a variety of colours.
- 4 Heat staking is used to permanently affix the twister inside the seal's body. If the seal is cut or forced open, this ensures it leaves clear evidence of tampering.

Technical Specifications

PRODUCT

Material	Wire Length	Wire Diameter	Tensile Strength	Marking Area	Max Marking Digits
Body: Polycarbonate Twister: Acetal	150 mm (std) or Customised	Stainless Steel (Coated) 0.8 mm Stainless Steel (Non-coated) 0.7 mm	30kg	5.0 x 12.0 mm	8

INNER CARTON

Carton Quantity	Dimensions (mm)	Weight kg/carton	Volume m ³ /carton
1,000 pcs	301 x 196 x 146	2.36	0.00861

OUTER CARTON

Quantity	Dimensions (mm)	Weight kg/carton	Volume m ³ /carton
5,000 pcs	814 x 322 x 217	12.62	0.05688
